

**Animal Hazards Program**  
**Category Summary & Basic Occupational Health Care Recommendations**

Category	Animal Contact	Rabies Series of 3	Rabies Titer Every 2 Years	Tetanus Every 10 years	TB Skin Test	Annual Flu	Annual Respirator Fit Test (if using one)	Other
1	Domesticated small mammals, i.e., rodents, rabbits, guinea pigs, dogs and cats			X			X	Also see information on allergies. Also see information on cats and toxoplasmosis.
2	Farm animals, i.e., cattle, horses, sheep, pigs, goats	*		X	*		X	See information on Q-fever. *May be recommended depending on where animals are obtained or if extensive field work is being done.
3	Non-Human Primates, i.e., monkeys, chimpanzees			X	Biannual		X	See information on Cercopithecine herpesvirus 1
4	Wild caught rodents and small mammals, i.e., skunks, foxes, bats, raccoons	X	X	X			X	Including trapping/observing; also see information on Hanta Virus
5	Big game wildlife, i.e., deer, elk, mountain lions, bears	X	X	X	Annually			Including trapping/observing
6	Bird and poultry species (wild and domesticated)	*		X	Annually	X	X	* If doing extensive field research and/or spending nights in the field, add rabies
7	Fish, reptiles, amphibians	*		X				*If doing extensive field research and/or spending nights in the field, add rabies
8	All veterinarians and those working in pathology areas, i.e., Vet Diagnostic lab and UAC Pathology	X	X	X	Biannual	X	X	
9	Cell lines/tissue cultures ONLY			X				Will be determined by individual risk assessment
10	Support staff entering non-human primate areas – environmental exposure in the routine performance of duty, i.e., maintenance				Biannual			Note: Custodial staff at UAC will submit an RAQ and be assessed for allergy risk.

11	Exempt - contact limited to in-vitro work with animal tissues, fluids or waste byproducts that have been sterilized chemically or via autoclaving.							
12	Exempt – no animal contact expected and not entering animal areas, i.e., those doing paperwork only							
13	Medical Surveillance Program Declination on file.
