

Travel Vaccinations

Going abroad? Before you pack your bags or track down your passport, don't forget to allow plenty of time for travel immunizations.

Since your body needs time to build immunity following vaccinations, plan on receiving them at least two weeks before your trip. Show up for your vaccinations too close to your travel date and you may be ineligible to receive the shots you need.

To schedule an appointment at Campus Health, call 621-2292 or simply stop by.

Remember: Last minute packing may be a fact of life, but there's no such thing as eleventh-hour travel immunizations. Get the travel shots you need by getting them early.
